Redux · Bootstrap · HTML · JavaScript · React js · Sql · CSS · ES6 · c++ · Git & GithHub · Node js · Mongodb · Express js · Application Development · Project Development

PERSONAL PROJECTS

Weather App

- The Weather App is a simple project developed using React Js, CSS, and HTML. The user can check the condition of the present-day climate probability and predict whether the day is a cloudy or sunny day. The user can write down the name of any city across the world in the app.

Movie Ticket Booking App

- A movie ticket booking system is developed by using Mern Stack in which a user can reserve a seat and can book ticket . This platform provide details about movie released date and actors. It has a admin panel also in which admin can add a new movie and can delete movie.

News Application

- The News App is a simple MERN Stack project . This software will make it easy for users to publish their news or articles within the app itself. Additionally, users can add images to their articles to make them more visually appealing.
